## PROJECTS

### Book Bin — [[GitHub](#)]

An online bookstore built using PERN Stack technologies. It allows users to add, delete and edit book-related information. It also lets users write book reviews on their favorite books.

- Building a Front End Using React Technology
- Backend and database using NPM Express and Postgres technologies and verified with Postman
- The book review section uses a one-to-many approach and Bootstrap for beautification.

### Snack-A-Log — [[GitHub](#)]

This is a two-person programming project. Users can choose their favorite healthy foods based on protein, fat and sugar content.

- Building a Front End Using React Technology
- Backend and database using NPM Express and Postgres technologies and verified with Postman
- Users can add, edit or delete healthy or unhealthy foods.

## EXPERIENCE

### International Home Healthcare, New York, NY — Home Health Aid

July 2017- April 2020

- Provided specialized healthcare services to more than 30 elderly and incapacitated diabetic patients
- Coordinated with families, healthcare providers and support services to ensure patients' achievement of health milestones and access to services (i.e. laundry, religious activities)

## SKILLS

HTML, CSS, Javascript, React, SQL, Node.js, Express, API Creation/Implementation, Heroku, Netlify, NPM, Database Technology, Web Architecture, Sourcetree etc, CompTIA A+, CompTIA Network+ (2016)

## LANGUAGES

JavaScript, English & Chinese

## EDUCATION

### Pursuit

Long Island City, NY

June 2021 - Present

Engineering fellowship

With a 9% acceptance rate

### Institution you received a degree or certification

### Certification (Brooklyn Adult Learning Center), New York, NY — 2016

CompTIA A+, CompTIA Network+
